

Medweb Executives to Speak at International Virtual e-Hospital Foundation in Republic of Montenegro

As a co-sponsor of the event, Medweb's CEO and Director of Telemedicine will share their expertise on developing and integrating Telemedicine applications

SAN FRANCISCO, CA, November 19, 2010 – Medweb announced today that Pete Killcommons, MD, CEO and Linda Branagan, PhD, Director of Telemedicine Products, are speaking November 20 at the International Virtual e-Hospital Foundation (IVeH) Fourth Intensive Balkan Telemedicine and e-Health Seminar in the Republic of Montenegro. Medweb is a co-sponsor of the event and Dr. Killcommons is also a member of the seminar faculty.

“Medweb has a rich history of providing technology and knowledge to countries throughout the world that seek to build a sustainable healthcare system using information technology,” Dr. Killcommons says. “Our goal is to help the Republic of Montenegro create a framework for the successful deployment of telemedicine that can help further advance the delivery of healthcare to this region.”

Dr. Killcommons' talk will discuss the integration of teleradiology and telemedicine solutions into the integrated healthcare environment. Dr. Branagan's presentation will cover technical requirements of multi-specialty store and forward telemedicine.

According to an announcement released by IVeH, the prior three seminars provided a foundation for telemedicine to emerge as a significant tool for enhancing healthcare in the Balkans. Representatives from Macedonia, Kosovo and Albania are also participating in round table discussions to share insight on their country's evolving national telemedicine programs.

Rifat Latifi, MD, FACS, President of IVeH and Program Chairman, and Professor of Surgery at the University of Arizona, Tucson, hopes that the 4th Intensive Balkan Telemedicine and e-Health Seminar will “provide the framework and be the mechanism by which telemedicine and e-health are established in the Republic of Montenegro, and connect all doctors, nurses, and other healthcare workers in the Balkans by providing state of the art healthcare services to people in the region.”

More information on IVeH can be found at <http://www.iveh.org/>, by emailing info@iveh.org or calling IVeH's Anchorage, AK offices at (520) 243-9086.

About Medweb

Medweb has been setting the standard for telemedicine for over 20 years with the most innovative, easy to use solutions for a variety of government, healthcare and educational institutions. Medweb provides a scalable, patented web-based platform, fully customizable to meet the needs of clinical specialists and administrators.
